This image was created by İHSAN ERDEMLER using DALL-E with the prompt: 'The background is a sleek, futuristic laboratory environment with clean, minimalist architectural elements. Robotic arms and drones are in motion, engaging in construction tasks and interacting with architectural models. A large, semi-transparent digital screen in the center displays holographic blueprints of avant-garde architectural designs with glowing neon lights. The color palette includes steel grey, deep blue, and silver, with neon turquoise and bright white accents.'
